Appl. No. 10/620,052 Amdt. dated July 20, 2007

Amendment under 37 CFR 1.116 Expedited Procedure

Examining Group 1642

## Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

## Listing of Claims:

- (Currently amended) A method for identifying a compound that modulates cell eyele arrest proliferation, the method comprising the steps of:
- (i) determining in vitro the effect of the compound upon a flap structure specific endonuclease 1 (FEN1) polypeptide, wherein the FEN1 polypeptide has at least 95% identity to SEQ ID NO: 14 and wherein the FEN1 polypeptide has nuclease activity;
- (ii) contacting a cell comprising the FEN1 polypeptide or fragment thereof or inactive variant thereof with the compound, wherein the FEN1 polypeptide is a heterologous protein and wherein the cell is an A549 cell or an H1299 cell; and
- (iii) determining the cell eyele proliferation effect of the compound upon the cell comprising the heterologous FEN1 polypeptide, thereby identifying a compound that modulates cell eyele arrest proliferation.
- (Currently amended) The method of claim 1, wherein the cell eyele
  proliferation effect of the compound is compared to the effect of the compound on a cell
  comprising a dominant negative mutant FEN1 polypeptide.
- (Withdrawn) The method of claim 1, wherein the chemical or phenotypic effect is determined by measuring cellular proliferation.
- (Withdrawn-currently amended) The method of elaim-3 <u>claim 1</u>, wherein the cellular proliferation is measured by assaying fluorescent marker level or DNA synthesis.
- (Withdrawn) The method of claim 4, wherein DNA synthesis is measured by 3H thymidine incorporation, BrdU incorporation, or Hoescht staining.

Appl. No. 10/620,052 Amdt. dated July 20, 2007

Amendment under 37 CFR 1.116 Expedited Procedure Examining Group 1642

6

(Withdrawn) The method of claim 4, wherein the fluorescent marker is selected from the group consisting of a cell tracker dye or green fluorescent protein.

(Currently amended) The method of claim 1, wherein modulation is 7. activation inhibition of cell eyele arrest proliferation.

8-15. (Cancelled)

16. (Previously presented) The method of claim 1, wherein the polypeptide is encoded by a nucleic acid comprising a sequence of SEO ID NO:13.

17. (Withdrawn) The method of claim 1, wherein the compound is an antibody.

18 (Original) The method of claim 1, wherein the compound is a small organic molecule.

19. (Withdrawn) The method of claim 1, wherein the compound is an antisense molecule.

> (Withdrawn) The method of claim 1, wherein the compound is a peptide. 20.

21. (Withdrawn) The method of claim 20, wherein the peptide is circular.

22 (Withdrawn) The method of claim 1, wherein the compound is an siRNA

23-44. (Cancelled)

molecule.

45. (New) The method of claim 1, wherein expression of a FEN1 D181A mutant polypeptide in an A549 cell causes inhibition of cell proliferation.
